## **DETAILED ACTION**

### ***Priority***

This application is a CON of PCT/US02/12609 04/22/2002, and which claims benefit for domestic priority under 35 U.S.C. § 119(e) [to a provisional application 60/285,631 04/20/2001], is acknowledged.

### ***Status of Claims***

Claims 1-16 are currently pending in the application.

Claims 1-4, 11-13, 15 and 16 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

### ***Response to Election/Restriction***

In response to the restriction requirement, Applicants have elected Group III, (which includes claim 5 only) drawn to a compound with traverse is acknowledged. However, during a telephonic interview, with Mr. Patrick J. Hagan (Attorney for Applicant) on March 16, 2005, Applicant has agreed to cancel non-elected claims 1-4, 11-13, 15 and 16. On the other hand, Examiner has agreed to rejoin claims 6-10 and 14 with the elected Group III because they fall within the scope of elected invention. Therefore, the restriction requirement is hereby withdrawn and hence, all remaining pending claims 5-10 and 14 are allowable over the prior art of record.

### ***Examiner's amendment***

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Patrick J. Hagan (Attorney for Applicant) on March 16, 2005.

The application has been amended as follows:

- a. Claims 1-4, 11-13, 15 and 16 have been canceled.

***Reasons for allowance***

The following is an Examiner's statement of reasons for allowance:

Menges *et al* (WO 99/06394) teach substituted 2-(benzoaryl)pyridine compounds, which are useful as herbicides. The instant compound differs from the prior art by having a compound, which is further substituted by different variables such as R<sup>1</sup>, R<sup>2</sup> [with a nitrogen link] and R<sup>7</sup> that are attached directly or indirectly to the core isoquinoline ring. The prior art compound neither teaches nor renders obvious the instantly claimed invention and there is no suggestion or motivation to modify the compound of other prior art to obtain the instant compounds. Therefore the instant claims are allowable over the prior art of record.
